

[Person]

Views correlations
in form of charts,
etc.

Energy Correlation Detection System

[Software System]

Allows users to view real time analysis of
correlations between weather phenomenons, the
energy grid (load, generation, ...), and carbon
intensity

← fetches data

← fetches data →

Carbon Intensity API

[External System]

Provides real-time data on carbon intensity
regarding different energy sources

Weather API

[External System]

Provides real-time data on weather
phenomena, such as wind drought, cloud
coverage, etc.

fetches data

Energy Grid API

[External System]

Provides real-time data on the energy grid for
categories such as load, generation, etc.
